The At Cost Metals Comparison Checklist

Use this side-by-side checklist to compare any precious-metals seller — honestly.

GUIDED BY TERI SHULER · INDEPENDENT AT COST METALS AFFILIATE

atcostmetals.com/?ref=MENTOR

1. Price vs. spot

Is the price close to live spot, with a clear, low premium you can verify?

2. Price-check freedom

Can you compare the exact item against major dealers in real time, with no pushback?

3. Membership math

If there's a membership fee, do the repeat-purchase savings realistically offset it for you?

4. Product range

Are there enough recognized coins and trusted bars to actually meet your goals?

5. Storage & delivery

Insured shipping AND an optional insured vault? Can you ship or sell back anytime?

6. Transparency

Are fees, premiums, and terms stated plainly — no hidden costs, no vague claims?

7. Pressure level

Education-first and no-pressure, or hype, urgency, and fear-based selling?

8. People & support

Is there a real, responsive human guide who answers questions honestly?

9. Compliance & honesty

Clear disclosures, no income or price guarantees, no exaggerated claims?

10. Your gut check

After comparing, does it feel clear and trustworthy — or confusing and rushed?
